

Measuring Guide for Cellular Shades and Pleated Shades

Double-check your work—always measure twice to ensure accuracy.

Tools and Tips

- Steel tape measure—do not use cloth measuring tape
- Pencil
- Measuring Worksheet—see page 3
- Measure each window and record location on worksheet—size variances are common
- Round measurements to the nearest $\frac{1}{8}$ "
- Clearly record measurements—width vs. height

Choose a Mount Type: Inside Mount or Outside Mount

(See next page if you need help deciding which mount is best for your windows.)

Inside Mount

Window treatments are installed inside the window casing.

Inside Mount Blind

Depth

Width

Height

- ❶ **Measure Depth:** See chart on next page to determine if window casing has enough depth for an inside mount window treatment.
- ❷ **Measure Width:** Measure the inside width of window casing in three places. Record narrowest measurement.
- ❸ **Measure Height:** Measure the inside height from the top of window casing to top of sill in three places. Record longest measurement.

Note: Do not take any deductions for clearance. The manufacturer will take a $\frac{3}{8}$ " deduction off the overall width for a perfect fit.

Outside Mount

Window treatments are installed outside the window casing. Mount directly to wall or molding.

Outside Mount Blind

Width

Headrail Location

Height

- ❶ **Measure Width:** Measure width to be covered. We recommend $1\frac{1}{2}$ " overlap on each side of the window (3" total) for optimum light control and privacy. Record measurement.
- ❷ **Determine Headrail Location:** Determine if headrail will be on molding or above molding and mark spot.
- ❸ **Measure Height:** Measure height to be covered from top of headrail location to top of sill or lower if overlap is desired for additional light control and privacy. Record measurement.

Note: The manufacturer takes NO deductions on outside mount installations.

GRABER.

Mounting Considerations

Reasons for Choosing Inside Mount

Clean Look

- Inside mount treatments are installed inside the window casing, showcasing attractive window trim.
- The window opening frames the window treatment for a finished, clean appearance.

Allows Sill Space on Deep Windows

- In some deep-set windows, the window treatment can be installed to allow plants or other items to be placed in front of the window treatment on the sill.

Limitations of Inside Mount

Light Gaps

- A small deduction in the width is taken at the factory to allow for proper operating clearance, and this causes a small gap on each side of the window treatment, affecting the treatment's ability to darken a room.

Obstructed View

- The stack (compressed portion of the window treatment when fully raised) will obstruct part of the view from the window.

Architectural Obstacles

- Obstacles, such as handles and cranks, can interfere with the operation of inside mount treatments.

Reasons for Choosing Outside Mount

Improve Privacy and Light Control

- Light gaps on the side of the window treatment can be substantially diminished or eliminated.

Fewer Installation Limitations

- Outside mount window treatments are ideal for covering nonsquare windows.
- Outside mount window treatments are installed higher than the window opening for an unobstructed view when fully raised.

Architectural Obstacles

- Outside mount window treatments can clear obstacles like handles and cranks.

Enlarge the Look of a Small Window

- Increase overlap above and below or to each side of the window.

Hide Window Trim

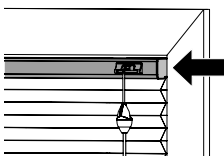

- Outside mount window treatments can easily hide unattractive window trim.

Limitation of Outside Mount

Required Surface Above Window Frame

- Outside mount brackets require at least 2" of flat surface above window or on window frame for mounting brackets; projection brackets or shims can be ordered if needed to clear frame or molding.

Depth Requirements for Inside Mount

Cellular and Pleated Shades	Control Type	 Partially recessed headrail in window casing/molding.	
		Minimum Depth Mount (inches)	Flush with Casing (inches)
$\frac{3}{8}$ " Cellular Shades • Single Cell	Standard Cord Lift	$1\frac{1}{16}$	$1\frac{15}{16}$
	Cordless Lift	$\frac{5}{8}$	$2\frac{3}{8}$
	Continuous-Loop Lift		
	Motorization		
$\frac{3}{4}$ " Cellular Shades • Single Cell $\frac{1}{2}$ " Cellular Shades • Double Cell	Standard Cord Lift	$1\frac{1}{16}$	$2\frac{1}{4}$
	Cordless Lift	$\frac{5}{8}$	$2\frac{5}{8}$
	Continuous-Loop Lift		
	Motorization		
$1\frac{1}{4}$ " Cellular Shades • Single Cell	Cordless Lift	$1\frac{3}{8}$	$3\frac{3}{8}$
	Motorization		
1" EvenPleat® Pleated Shades	Standard Cord Lift	$1\frac{1}{16}$	$1\frac{15}{16}$
	Cordless Lift	$\frac{5}{8}$	$2\frac{3}{8}$
	Continuous-Loop Lift		
	Motorization		
2" EvenPleat Pleated Shades	Standard Cord Lift	$1\frac{1}{16}$	$2\frac{1}{4}$
	Cordless Lift	$\frac{5}{8}$	$2\frac{5}{8}$
	Continuous-Loop Lift		
	Motorization		

Measuring and Ordering Worksheet

Window #1 _____
(location)

Measuring

For Inside Mount

Depth of window casing: _____

Measure width of window in three places and circle the narrowest width below:

Width #1: _____

Width #2: _____

Width #3: _____

Measure height of window in three places and circle the longest height below:

Height #1: _____

Height #2: _____

Height #3: _____

For Outside Mount

Width: _____

Height: _____

Ordering

Mount Type: ☐ Inside ☐ Outside

Ordering Width: _____

Ordering Height: _____
