

Smart Home Collection Hub

Set-Up Instructions for IOS

The Smart Home Collection Hub connects to home networks to unlock the luxury of shade control. Experience customization with scene and timer options as well as voice control via Google Assistant, Amazon Alexa and Apple HomeKit.

THE APP ALLOWS FOR:

1. Individual and group control – Group of shades by room and conveniently control them accordingly.
2. Remote connectivity - Control shades remotely, whether home or away on a local network or an internet connection.
3. Scene control Personalize shade control and organize how your shades operate by specific daily events.
4. Timer functionality - Set and forget. Lower, raise and activate shade scenes automatically at the optimal time.
5. Sunrise and Sunset - Utilizing time zone and location, the SHC Hub can automatically raise or lower shades according to the position of the sun.
6. Compatible IoT Integrations
 - IFTTT via applets
 - Amazon Alexa devices
 - Google Home
 - Apple HomeKit

GETTING STARTED:

In order to experience the shade control through the SHC app, you will need to have:

- Downloaded the free app via the Apple App Store (available under iPhone apps) or iPad apps for iPad devices
- Purchased one or more Hub's depending on size of the area you would like to cover.
- Familiarize yourself with the app navigation guide further below
- Create a Location then pair hub to that location our step by step guide will explain in more detail

WI-FI HUB TECHNICAL SPECIFICATIONS:

- Radio Frequency range: ~130 feet (40m) (no obstructions)
- Radio Frequency: 433MHz
- Wi-Fi 2.4GHz or Ethernet Connectivity (CAT 5)
- Power: 5V DC
- For Indoor Use Only

SETUP BEST PRACTICES:

- The Hub must be within signal range of both the shades and the connected via Lan or Wi-Fi router.
- If you chose to use the Wi-Fi network, certify that it must be visible.
- Environments with multiple WAPs (wireless access points) may need to temporarily disable all but one.
- Security settings may need to be temporarily disabled.

CAPABILITIES:

- Motors per Hub: 20
- Locations per account: 5
- Hub's per location: 5
- Rooms per Location: 30
- Scenes per Location: 15
- Timers per Location: 15

WHAT'S IN THE BOX?

A
Automate Pulse Hub

b
USB Power Supply
(EU/AU & US) 1 x 40"
Power Plug adaptor
Options

c
32" (80cm) USB Power Cord

	Battery Icon Yellow	The Battery Level is between 50% and 70%.
	Battery Icon Red	The Battery Level is less than 50%.
	Offline mode	The motor is offline, and the mobile is not in the same network.

TROUBLESHOOTING:

The following scenarios are common issues that may cause connectivity problems during the Smart Home Collection Hub pairing process. If you cannot achieve success connecting the Smart Home Collection Hub to your network, please reference the below most common pairing roadblocks.

I CANNOT CONNECT TO MY HIDDEN WI-FI NETWORK.

The Smart Home Collection Hub does not currently support pairing with hidden networks. To connect to a hidden network, you will need to unhide the network. Once the network pairing process is complete you can re-hide the network and the Wi-Fi HUB will work without issue.

I HAVE MULTIPLE ACCESS POINTS AND CANNOT COMPLETE THE PAIRING PROCESS.

If you have multiple wireless access points, we recommend that you turn off all but one to complete the network pairing process. Once this is complete you can turn on all of the wireless access points and the Wi-Fi HUB will work without issue.

I CANNOT CONNECT TO MY 5GHZ WI-FI NETWORK.

The Smart Home Collection Hub does not currently support operation over a 5GHz network. It operates on a 2.4GHz network or using a LAN CONNECTION (CAT 5). Most routers are dual band and can support both network configurations. Please make sure that the 2.4GHz band is turned on in your wireless router's settings.

NETWORK SECURITY SETTINGS ARE INTERFERING WITH THE SETUP PROCESS.

Some companies or large corporate offices have network security settings more advanced than the typical homeowner. If you are setting up in this environment, please consult your network administrator. It may be necessary to enable device-to-device communication. One solution is to use a device with a mobile data connection available in the background to complete the set-up process.

MY SMART HOME COLLECTION HUB IS NOT CONSISTENTLY WORKING.

There are many things that can interfere with the radio communication that the Smart Home Collection uses. Try positioning the Smart Home Collection in a different location and/or closer to the shade to improve performance. Due to varying levels of interference it may be necessary to purchase additional Wi-Fi HUB's to extend the coverage throughout your location.
